Secutech 2026 sparks collaboration and AI innovation across Asia

Taipei, 22 April 2026. The 27th edition of Secutech opens today at the Taipei Nangang Exhibition Center, featuring around 400 exhibitors from nine countries and regions, including China, Germany, Japan, Korea, Singapore, Spain, Taiwan, the UK and the US. Spanning over 15,000 sqm, the fair is primed to deliver a vibrant showcase of intelligent, secure, and sustainable solutions for the security and fire safety industries, affirming its position as Asia Pacific's leading hub for innovation and procurement. Amid growing emphasis on data privacy, supply chain integrity, and AI ethics, Secutech 2026 welcomes buyer delegations from India, Indonesia, Japan, Myanmar, Singapore, Thailand, and Vietnam to identify secure by design solutions and build strategic partnerships that strengthen intelligent infrastructure across the region.

"Security today is defined by trust, transparency, and resilience," said Ms Regina Tsai, General Manager of Messe Frankfurt (HK) Ltd, Taiwan Branch. "This year's show spotlights how these three pillars translate into real-world innovation. Exhibitors are demonstrating a clear commitment to cybersecurity, quality assurance, and system compatibility. As a result, Secutech provides a platform where technology suppliers and solution providers can collaborate to advance the development of secure and connected industries."

Comprehensive sourcing and cross-industry solutions
Reflecting this outlook, Secutech 2026 features five specialised application zones across the show floor: Critical Infrastructure Security Applications, Smart Building and Living Applications, Smart Factory and Industrial Safety, Security + AIot, and Fire Protection / Disaster Prevention & Rescue. Together, these areas demonstrate how intelligent technologies combine safety, efficiency, and sustainability across industrial, commercial, and urban settings. Exhibitors such as Cheng Deh Fire Protection, Network Optix, REXLiTE.AI, TDV, Top Hi-Tech, and VIVOTEK will unveil advanced solutions in smart sensing, video analytics, access control, and fire management that help raise public and workplace safety standards.

Complementing its broad exhibitor line-up, Secutech deepens regional ties through delegations from the Asia Pacific Security Association (India), Asosiasi Kontraktor Konstruksi Indonesia, Security Solutions Association of Singapore, and the Thai Security Association. Major companies from Myanmar, Vietnam, and Japan will also be in attendance. This diverse participation enhances cross-border dialogue, bringing together security and smart-technology leaders to exchange insights, share expertise, and drive joint initiatives in AI and digital security.

Running concurrently with Fire & Safety and SMABuilding, the show offers an integrated platform where security, building, and emergency technologies intersect and new ideas circulate freely.

Expert forums on AI, data governance, and security standards
This year's fringe programme presents 20 seminars featuring over 130 sessions, covering important topics such as AI ethics, data governance, cyber-risk management, and smart-infrastructure standards. These sessions help professionals align innovation with global best practice and emerging regulations.

Key highlights include:

- **2026 Asia Disaster Prevention Summit**
  Supervised by the National Fire Agency and co-organised with the Taiwan Asia Exchange Foundation and the Taiwan Association for Disaster Prevention Industry, the summit gathers regional authorities and experts to review earthquake case studies and strengthen cross-border cooperation for disaster resilience in Taiwan and the APAC region.

- **Smart Building and Living Innovation Forum**
  This forum explores how climate change and digital transformation are affecting urban development, covering four core themes: healthy sustainability, digital innovation, energy efficiency, and building safety.

- **AI Trend Forum**
  Industry experts and researchers will share how AI is being applied to enhance precision, automation, and cross-sector integration. The discussions connect standards development with practical implementation to help enterprises adopt AI strategically.

- **Fire Safety & Disaster Prevention Seminar Series**
  This series focuses on cutting-edge firefighting and industrial safety solutions, introducing technologies for detection, disaster response, and factory risk management that strengthen overall safety operations.

Secutech is organised by Messe Frankfurt (HK) Ltd, Taiwan Branch and is part of a global network of Safety, Security & Fire trade fairs. For more details, please visit www.secutech.com. Alternatively, please call Mr Jason Cheng at +886 2 8729 1015, or send an email to jason.cheng@taiwan.messefrankfurt.com.

Safety and security are increasingly important basic needs and, therefore, stand for a growing global market. With ten trade fairs, congresses and forums around the world, Messe Frankfurt brings together demand and supply worldwide with progressive, connected products, applications and services focusing on commercial security and the protection of buildings, spaces and people. The Safety, Security & Fire business cluster offers access to the dynamic markets of the Arabian Peninsula, Asia, Europe and South America.
