

## Secutech 2026 to showcase the future of smart, data-driven security technology amid Taiwan's government-backed AI push

**Taipei, 4 December 2025. Secutech, Asia's premier security exhibition, will be held from 22 – 24 April 2026 at the Taipei Nangang Exhibition Center, Hall 1. This edition promises a robust showcase of more than 400 international exhibitors and an expected influx of over 15,000 visitors. Against the backdrop of Taiwan's government investing USD 3 billion to accelerate its transformation into an "AI island",<sup>1</sup> this year's focus will centre on four key industry pillars across seven thematic zones prioritising intelligent security solutions that integrate AIoT and data-driven technologies to enable proactive safety, precise management, and sustainable operations.**

With AI playing a key role in Taiwan's new development plan<sup>2</sup>, Ms Regina Tsai, General Manager, Messe Frankfurt (HK) Ltd – Taiwan Branch stated: "Taiwan's significant investment in AI and smart security technologies is fuelling demand for next-generation solutions. Consequently, Secutech provides a preview of Taiwan's security future by bringing together global pioneers from the security, fire safety, disaster prevention, occupational safety, building technology, and cybersecurity sectors."

This year's show highlights four key industry pillars, each centred around the implementation of smart security technologies across key verticals:

- **Critical Infrastructure Protection:** featuring AIoT, image recognition, sensing, and cybersecurity to enable comprehensive "predict–detect–respond–recover" capabilities, strengthening resilience across vital sectors such as energy, transportation, healthcare, and manufacturing.
- **Smart Fire Safety & Emergency Response:** Showcasing AI visual detection, thermal sensing, wireless monitoring, and smart fire control systems to build intelligent city-wide safety networks for improved disaster and rescue management.
- **Smart Industrial Safety & ESG Protection:** Centred on smart tech, digitalisation, and sustainability, with demonstrations of AI wearables, gas detectors, and cloud safety management platforms that assist industries in achieving zero accident, zero downtime, and zero carbon targets.

<sup>2</sup> 'Taiwan to advance AI and robotics in new national development plan', August 2025, RTI News, <https://www.rti.org.tw/en/news?uid=3&pid=159788>, (Retrieved: November 2025)

- **Sustainable Smart Building & ESG Applications:** Focusing on energy efficiency, low carbon footprint, health, and safety through innovations like BIM/FM/GIS systems, AIoT energy control, and indoor air quality monitoring, supporting the construction industry's transition to net-zero and smart living environments.

The solutions and products pertaining to these pillars will be organised thematically into seven zones and pavilions – Critical Infrastructure Security, Smart Surveillance, AI Innovation, Smart Living & Building, Smart Industrial Safety, Fire & Disaster Rescue, and the AIoT Cybersecurity Pavilion – each designed to provide visitors with a hands-on look at cutting-edge, cross-sector security innovations from around the world.

Secutech 2026 will also spotlight Cybersecurity & AI integration, addressing the convergence of IT and OT systems and emphasising AI threat detection, Zero Trust Architecture, and supply chain security. These will align with international standards such as ISA/IEC 62443 to meet evolving local and global security demands.

Ms Tsai commented: “For key industry players and system integrators in Taiwan, this event serves as a vital one-stop platform to discover cutting-edge products, gain fresh industry insights, and foster international partnerships. By creating unparalleled opportunities to enhance visibility and maximise return on investment across the entire value chain, Secutech continues to propel the industry towards a safer, smarter future for Taiwan and beyond.”

To complement the exhibition, the Asia Disaster Prevention Summit will be held concurrently. This summit assembles experts to share insights on earthquake case studies, cross-border collaboration, and innovative approaches to strengthening disaster resilience in Taiwan and the wider Asia-Pacific region. The fair also takes place alongside the concurrent Fire & Safety and SMAbuilding events.

Secutech is organised by Messe Frankfurt (HK) Ltd – Taiwan Branch and is part of a global network of Safety, Security & Fire trade fairs. The next edition will be held from 22 – 24 April 2026. For more details, please visit [www.secutech.com](http://www.secutech.com).

Alternatively, please call Mr Jason Cheng at +886 2 8729 1015, or send an email to [jason.cheng@taiwan.messefrankfurt.com](mailto:jason.cheng@taiwan.messefrankfurt.com).

Safety and security are increasingly important basic needs and, therefore, stand for a growing global market. With ten trade fairs, congresses and forums around the world, Messe Frankfurt brings together demand and supply worldwide with progressive, connected products, applications and services focusing on commercial security and the protection of buildings, spaces and people. The Safety, Security & Fire business cluster offers access to the dynamic markets of the Arabian Peninsula, Asia, Europe and South America.

**Background information on Messe Frankfurt**

The Messe Frankfurt Group is the world's largest trade fair, congress and event organiser with its own exhibition grounds. With a workforce of some 2,500 people at its headquarters in Frankfurt am Main and in 29 subsidiaries, it organises events around the world. Group sales in financial year 2024 were around € 775 million. We serve our customers' business interests efficiently within the framework of our Fairs & Events, Locations and Services business fields. One of Messe Frankfurt's key strengths is its powerful and closely knit global sales network, which covers around 180 countries in all regions of the world. Our comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events. We are using our digital expertise to develop new business models. The wide range of services includes renting exhibition grounds, trade fair construction and marketing, personnel and food services.

Sustainability is a central pillar of our corporate strategy. Here, we strike a healthy balance between ecological and economic interests, social responsibility and diversity.

For more information, please visit our website at:
