Asia Regional Expo for Intelligent
Fire Safety and Disaster Prevention

Date:

22 – 24 April, 2020

Venue:

Taipei Nangang Exhibition Centre
Hall 2, Taipei, Taiwan

firesafety.secutech.com

The Advanced Tech Platform for Smart Fire Safety and Disaster Management in Asia

2019 Show Facts:

335 Exhibiting brands

20,000 net sqm.

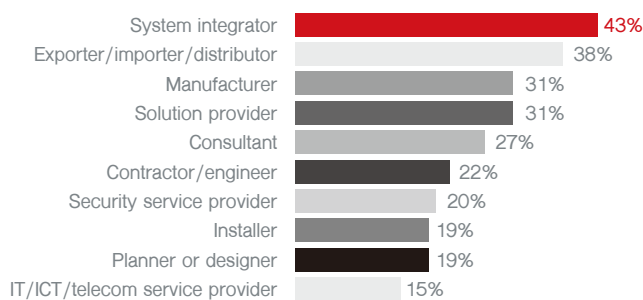

18,187 Domestic visitors

1,769 International visitors

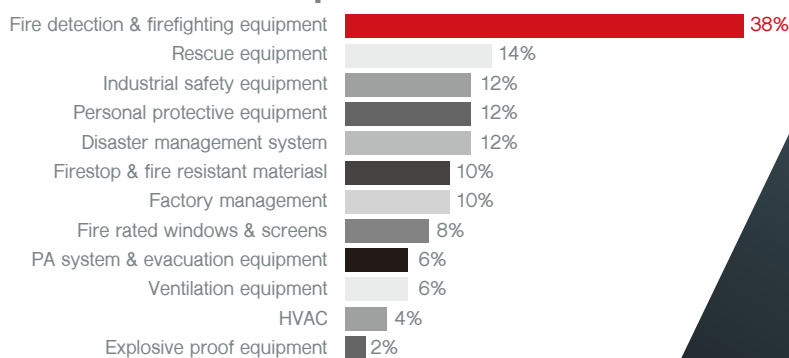

180 Seminar sessions

319 Business matching sessions

Business nature of visitors

Visitors products of interest

Visitor Breakdown

• **Government authorities:** Municipalities (EPD, Fire Department, Water Resources Department, Water Conservation Bureau, Highway Administration, Forest Service, Geological Survey), county and city government units (fire station, headquarters, water conservancy bureau), Works Bureau, Traffic Bureau

• **Engineering related industries:** Engineering consultants, hydropower air conditioning engineering, mechanical and electrical engineering, construction engineering

• **Professional technician:** Fire equipment technician, architect, hydroelectric air conditioner technician, motor technician, work safety technician

• **Fire and disaster prevention industry:** Importers, distribution agents, manufacturers, engineering design contractors, design and installation

• **Enterprises:** State-owned enterprises, high-tech science parks, petrochemical industry, heavy industry, machinery, food, construction, transportation, power telecommunications, military units, schools, large-scale public places (hospitals / stores / restaurants / department stores, etc.) , property insurance / insurance company

Why Taiwan

Changing economic climate is bringing Taiwanese enterprises such as IT companies and other manufacturers to relocate manufacturing back to Taiwan. The government supports returning businesses in renovating and building new facilities that will require top fire safety technologies to monitor and prevent potential incidents. Strong demand in verticals such as manufacturing, retail and department stores, and finance & insurance drives a need for more smart fire safety implementations to prevent fire related incidents.

Smart Fire Safety

Taiwan has been seeing an ever increasing developments in many verticals. During the Q2 of 2019, sectors including manufacturing, retail and department stores, and financial & insurance sector has all seen an increase as demand for each of the sectors rises. The demand will in turn be requiring more smart fire safety implementations to prevent fire related incidents.

Top required products and solutions:

Fire extinguishing equipment | Escape refuge equipment | Fire alarm equipment | Public address system | Fire door / fire window | Fireproof material

Smart disaster prevention

Taiwan is no stranger to natural disaster and extreme weather conditions. Heavy rains, typhoon, flooding and earthquakes are common features of the island. Fire and safety is the only show of its kind in Taiwan that deals with disaster prevention and resiliency. The show is supported by relevant government units and brings representatives from Disaster Management Society of Taiwan, Chinese Taipei Geophysical Society, Taiwan Group on Earth Observation, and Office of Disaster Management Executive Yuan just to name a few.

Top required products and solutions:

Forecast/warning equipment | Disaster relief materials and disaster recovery and reconstruction equipment | Rescue disaster site technology and equipment | Emergency communications and video equipment | Personal protection and hygiene equipment
